

17th June 2015

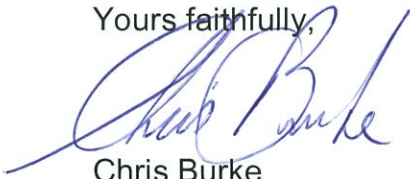

To whom it may concern,

ICB Construction Ltd is one of NZ's foremost retaining wall construction companies. We have been working with Pete Syred from Phi Group NZ Ltd since 2001 and have constructed Permacrib walls on more than 20 significant projects, including recent ground breaking architectural walls for feature ponds at the Westgate Town Centre in West Auckland.

Construction projects do not always go to plan and Phi Group, as the designer/supplier, has been able to provide key technical liaison between ICB, the project engineers and the clients. Pete works closely with our project managers to maintain quality assurance and ensure on time delivery. His flexibility, dedicated support and prompt response if construction issues arise, has greatly assisted us in keeping Permacrib projects on track and on budget.

I can confidently recommend Phi Group NZ Ltd as experts in their field and a highly professional and reliable supplier.

Yours faithfully,

Chris Burke
Managing Director
